1. New Repair Booking (repair_booking_confirmation)

1. API Configuration: Method: POST | URL: https://backend.aisensy.com/campaign/t1/api/v2 | Content-Type: application/json

2. Sample JSON Payload

```
{
  "apiKey": "YOUR_AISENSY_API_KEY",
  "campaignName": "repair_booking_confirmation",
  "destination": "+919876543210",
  "userName": "Ramesh Babu",
  "templateParams": [
    "REP-1042",
    "Apple iPhone 13",
    "Screen Replacement",
    "Same Day"
  ]
}
```

3. Parameter Explanation:

- templateParams[0]: Repair Job ID (REP-1042)
- templateParams[1]: Device Model (Apple iPhone 13)
- templateParams[2]: Service Name (Screen Replacement)
- templateParams[3]: Turnaround Estimate (Same Day)

4. Sample cURL Request:

```
curl --location \
'https://backend.aisensy.com/campaign/t1/api/v2' \
--header 'Content-Type: application/json' \
--data-raw '{
  "apiKey": "YOUR_AISENSY_API_KEY",
  "campaignName": "repair_booking_confirmation",
  "destination": "+919876543210",
  "userName": "Ramesh Babu",
  "templateParams": ["REP-1042", "Apple iPhone 13",
                     "Screen Replacement", "Same Day"]
}'
```

2. Repair Status Update (repair_status_update)

1. API Configuration: Method: POST | URL: https://backend.aisensy.com/campaign/t1/api/v2 | Content-Type: application/json

2. Sample JSON Payload

```
{
  "apiKey": "YOUR_AISENSY_API_KEY",
  "campaignName": "repair_status_update",
  "destination": "+919876543210",
  "userName": "Ramesh Babu",
  "templateParams": [
    "REP-1042",
    "Apple iPhone 13",
    "In Repair (Diagnosing Display IC)"
  ]
}
```

3. Parameter Explanation:

- templateParams[0]: Repair Job ID (REP-1042)
- templateParams[1]: Device Model (Apple iPhone 13)
- templateParams[2]: Live Status (In Repair (Diagnosing Display IC))

4. Sample cURL Request:

```
curl --location \
'https://backend.aisensy.com/campaign/t1/api/v2' \
--header 'Content-Type: application/json' \
--data-raw '{
  "apiKey": "YOUR_AISENSY_API_KEY",
  "campaignName": "repair_status_update",
  "destination": "+919876543210",
  "userName": "Ramesh Babu",
  "templateParams": ["REP-1042", "Apple iPhone 13",
                     "In Repair (Diagnosing Display IC)"]
}'
```

3. Device Ready for Pickup (device_ready_pickup)

1. API Configuration: Method: POST | URL: https://backend.aisensy.com/campaign/t1/api/v2 | Content-Type: application/json

2. Sample JSON Payload

```
{
  "apiKey": "YOUR_AISENSY_API_KEY",
  "campaignName": "device_ready_pickup",
  "destination": "+919876543210",
  "userName": "Ramesh Babu",
  "templateParams": [
    "Apple iPhone 13",
    "REP-1042",
    "4500"
  ]
}
```

3. Parameter Explanation:

- templateParams[0]: Device Model (Apple iPhone 13)
- templateParams[1]: Repair Job ID (REP-1042)
- templateParams[2]: Total Payable Amount in ■ (4500)

4. Sample cURL Request:

```
curl --location \
'https://backend.aisensy.com/campaign/t1/api/v2' \
--header 'Content-Type: application/json' \
--data-raw '{
  "apiKey": "YOUR_AISENSY_API_KEY",
  "campaignName": "device_ready_pickup",
  "destination": "+919876543210",
  "userName": "Ramesh Babu",
  "templateParams": ["Apple iPhone 13", "REP-1042", "4500"]
}'
```

4. Service Quotation & Estimation (service_quotation)

1. API Configuration: Method: POST | URL: https://backend.aisensy.com/campaign/t1/api/v2 | Content-Type: application/json

2. Sample JSON Payload

```
{
  "apiKey": "YOUR_AISENSY_API_KEY",
  "campaignName": "service_quotation",
  "destination": "+919876543210",
  "userName": "Ramesh Babu",
  "templateParams": [
    "Apple iPhone 13",
    "3200",
    "OEM Grade Display replacement with 90-day warranty"
  ]
}
```

3. Parameter Explanation:

- templateParams[0]: Device Model (Apple iPhone 13)
- templateParams[1]: Quoted Estimate Amount in ■ (3200)
- templateParams[2]: Service & Warranty Details (OEM Grade Display with 90-day warranty)

4. Sample cURL Request:

```
curl --location \
'https://backend.aisensy.com/campaign/t1/api/v2' \
--header 'Content-Type: application/json' \
--data-raw '{
  "apiKey": "YOUR_AISENSY_API_KEY",
  "campaignName": "service_quotation",
  "destination": "+919876543210",
  "userName": "Ramesh Babu",
  "templateParams": ["Apple iPhone 13", "3200",
                     "OEM Grade Display replacement"]
}'
```

5. Retail Order Dispatched (order_dispatched)

1. API Configuration: Method: POST | URL: https://backend.aisensy.com/campaign/t1/api/v2 | Content-Type: application/json

2. Sample JSON Payload

```
{
  "apiKey": "YOUR_AISENSY_API_KEY",
  "campaignName": "order_dispatched",
  "destination": "+919876543210",
  "userName": "Ramesh Babu",
  "templateParams": [
    "ORD-1001",
    "Apple iPhone 15",
    "Dispatched",
    "TRACK-12345"
  ]
}
```

3. Parameter Explanation:

- templateParams[0]: Retail Order ID (ORD-1001)
- templateParams[1]: Item / Product Name (Apple iPhone 15)
- templateParams[2]: Courier Status (Dispatched)
- templateParams[3]: Airway Bill / Tracking ID (TRACK-12345)
- templateParams[4]: Optional: media: {"url": ".../invoice.pdf"}

4. Sample cURL Request:

```
curl --location \
'https://backend.aisensy.com/campaign/t1/api/v2' \
--header 'Content-Type: application/json' \
--data-raw '{
  "apiKey": "YOUR_AISENSY_API_KEY",
  "campaignName": "order_dispatched",
  "destination": "+919876543210",
  "userName": "Ramesh Babu",
  "templateParams": ["ORD-1001", "Apple iPhone 15",
                     "Dispatched", "TRACK-12345"]
}'
```

6. Payment Completed Confirmation (payment_confirmation)

1. API Configuration: Method: POST | URL: https://backend.aisensy.com/campaign/t1/api/v2 | Content-Type: application/json

2. Sample JSON Payload

```
{
  "apiKey": "YOUR_AISENSY_API_KEY",
  "campaignName": "payment_confirmation",
  "destination": "+919876543210",
  "userName": "Ramesh Babu",
  "templateParams": [
    "4500",
    "REP-1042",
    "UPI-TXN-88219"
  ]
}
```

3. Parameter Explanation:

- templateParams[0]: Amount Received in ■ (4500)
- templateParams[1]: Job Card ID or Invoice Number (REP-1042)
- templateParams[2]: Bank / UPI Reference Number (UPI-TXN-88219)

4. Sample cURL Request:

```
curl --location \
'https://backend.aisensy.com/campaign/t1/api/v2' \
--header 'Content-Type: application/json' \
--data-raw '{
  "apiKey": "YOUR_AISENSY_API_KEY",
  "campaignName": "payment_confirmation",
  "destination": "+919876543210",
  "userName": "Ramesh Babu",
  "templateParams": ["4500", "REP-1042", "UPI-TXN-88219"]
}'
```

7. Warranty Certificate Issued (warranty_confirmation)

1. API Configuration: Method: POST | URL: https://backend.aisensy.com/campaign/t1/api/v2 | Content-Type: application/json

2. Sample JSON Payload

```
{
  "apiKey": "YOUR_AISENSY_API_KEY",
  "campaignName": "warranty_confirmation",
  "destination": "+919876543210",
  "userName": "Ramesh Babu",
  "templateParams": [
    "Apple iPhone 13",
    "WAR-1042",
    "90 Days"
  ]
}
```

3. Parameter Explanation:

- templateParams[0]: Device Model (Apple iPhone 13)
- templateParams[1]: Warranty Certificate Number (WAR-1042)
- templateParams[2]: Coverage Duration (90 Days)

4. Sample cURL Request:

```
curl --location \
'https://backend.aisensy.com/campaign/t1/api/v2' \
--header 'Content-Type: application/json' \
--data-raw '{
  "apiKey": "YOUR_AISENSY_API_KEY",
  "campaignName": "warranty_confirmation",
  "destination": "+919876543210",
  "userName": "Ramesh Babu",
  "templateParams": ["Apple iPhone 13", "WAR-1042", "90 Days"]
}'
```

8. Doorstep Device Pickup Scheduled (doorstep_pickup_confirmation)

1. API Configuration: Method: POST | URL: https://backend.aisensy.com/campaign/t1/api/v2 | Content-Type: application/json

2. Sample JSON Payload

```
{
  "apiKey": "YOUR_AISENSY_API_KEY",
  "campaignName": "doorstep_pickup_confirmation",
  "destination": "+919876543210",
  "userName": "Ramesh Babu",
  "templateParams": [
    "PU-502",
    "Apple iPhone 13",
    "Today, 4:00 PM – 5:00 PM",
    "TV Malai Road, Tirukannur, Pondicherry"
  ]
}
```

3. Parameter Explanation:

- templateParams[0]: Pickup Request ID (PU-502)
- templateParams[1]: Device Model (Apple iPhone 13)
- templateParams[2]: Arrival Time Window (Today, 4:00 PM – 5:00 PM)
- templateParams[3]: Customer Pickup Address (TV Malai Road, Tirukannur)

4. Sample cURL Request:

```
curl --location \
'https://backend.aisensy.com/campaign/t1/api/v2' \
--header 'Content-Type: application/json' \
--data-raw '{
  "apiKey": "YOUR_AISENSY_API_KEY",
  "campaignName": "doorstep_pickup_confirmation",
  "destination": "+919876543210",
  "userName": "Ramesh Babu",
  "templateParams": ["PU-502", "Apple iPhone 13",
                     "Today, 4 PM", "Tirukannur, Pondicherry"]
}'
```
